## Front End Specialist with 10+ years of experience

### | Experience

#### **Sr Front End Specialist at Chameleon**

Remote, San Francisco (US) — August 2021 - Current

At Chameleon, I'm responsible for evolving its product with new features, providing rapid-response critical fixes, and collaborating with the product/design teams to discuss, define and scope projects — before and during implementation. I also lead the weekly engineering show & tell meeting. My most recent big project there was [HelpBar.ai](#), which [got featured on Product Hunt](#) (top 5 product of the day).

#### **Sr Front End Developer at BabyCenter (via Toptal)**

Remote, San Francisco (US) — March 2018 - June 2021 (~3 years)

At BabyCenter, I was responsible for both maintaining their legacy (20+ years) codebases, and fully migrating/remaking it with using modern technologies (PWAs, React/Hooks, GraphQL/Apollo, NextJS, Jest, Cypress). I also worked on monetization-focused projects which directly impacted revenue, led their first two PWA projects, and also implemented/maintained third-party integrations (GA, GTM, AWS, etc.).

#### **Sr Front End Developer at Translucent Computing**

Remote, Toronto (Canada) — September 2017 - March 2018 (~7 months)

At Translucent team, I've worked in one of my favorite projects ever: a wide refactor and modernization of Spark, a web app for supporting cancer treatment for young patients by tracking symptoms and providing oriented insights for their doctors.

#### **Sr Full-stack Developer at Tegra**

Sorocaba, Brazil — November 2015 - August 2017 (~2 years)

At Tegra, I delivered 10+ projects for different market segments (including medical, retail, events, and finances); There, I also got a solid background on the entire Software Development lifecycle, from analysis & prototyping, through front end & back end implementations, to delivery & maintenance.

### | Education

#### **Systems' Analysis & Development @ FATEC Sorocaba (Graduation)**

Sorocaba, Brazil — Graduated in 2018

#### **Front End Specialization @ Caelum (Bootcamp)**

São Paulo, Brazil — Finished in 2014
